C

- 5. **Tools Required:**
  - 100% Isopropyl Alcohol
  - Micro Fiber Towel

6. **PRE-INSTALLATION CAUTIONS / NOTES:**

Clean the small area on the dash using 100% alcohol where the hook disc will be placed and allow to dry for 2 minutes (recommended).

**CAUTION**

- These parts are to be installed at room temperature.
- Dry fit the parts to get familiar with them and their position before applying alcohol and peeling the liner of the tape.
- After applying alcohol and peeling the liner of the tape, you have approximately 15-20 seconds before the tape starts to set.
- Do not reposition the hook disc once the tape has started to set/adhere to vehicle.

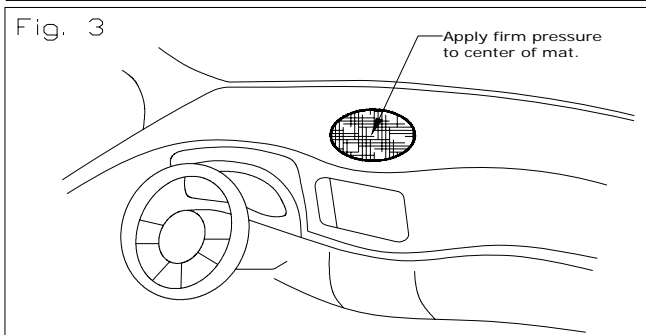

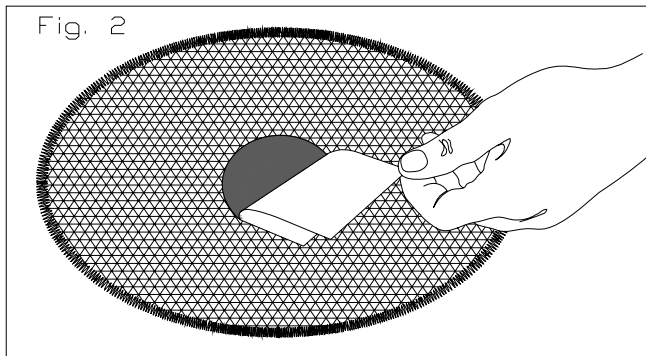

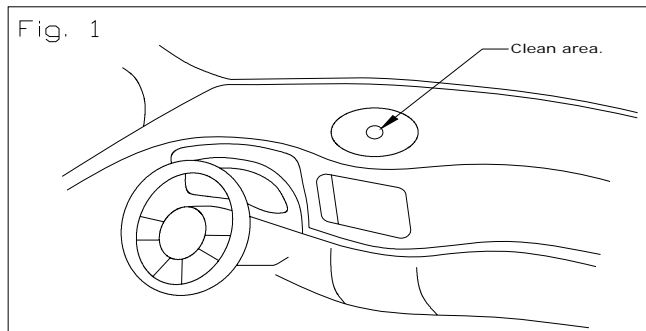

## INSTALLATION INSTRUCTIONS - DASH MAT

### Cleaning requirements:

Clean the small area on the dash as outlined below, where the hook disk is to adhere. Use 100% isopropyl alcohol with lint free cloth (micro fiber towel) to clean the dash surface. Wipe and dry thoroughly to ensure removal of any contaminants such as oil / grime / dirt / fibers etc. Install the hook disc with adhesive tape only when the dash surface is cleaned as required.

### 7. INSTALLATION PROCEDURE:

**NOTE: Do not remove hook disc from mat yet. Please read installation procedure fully before installing dash mat.**

1) Use the alcohol and towel to clean a small area on the dash at the center of recessed area, where hook disc will stick.

2) With hook disc attached to mat, peel backing film from adhesive side of hook disc. **(See Fig. 2.)**

3) Center the dash mat to the recessed area in the dash, and apply pressure at the center of the mat. **(See Fig. 3.)**

4) Apply pressure for 15-20 seconds to set tape.
